### mand usual to Friday. The rise in New | Decrease in the Banking Reserve Expected in the Bank Statement.

[Meyer & Kiser's Telegram.]

NEW YORK, Sept. 6 .- To-day's market offers very few opportunities for comment. Quotations received before 10 o'clock from ket, but quotations within such narrow limits as to preclude the possibility of any extensive arbitrage transactions. Commission business continued to be extremely dull, consequently prices were more or less at the mercy of the professional element, Plain fat steers, 1,350 lbs and uptake fractional profits. The strike news continues to be, on the whole, favorable to the steel corporation, although the terms Good feeding steers, 900 to 1,100 proposed by Mr. Schwab have apparently Medium feeding steers, 800 to 900 been turned down by President Shaffer. R. T. was under considerable pressure during the morning, being adversely affected both by the expectation that the annual statement would make an unfavorable showing and also by rumors that the extensive improvements that are now being made by the president would necessitate an early issue of bonds. Below 71 the stock enjoyed considerable support, which induced covering by the sellers of yesterday. Of the specialties Chicago, Indianapolis & Louisville was prominent. Philadelphia houses were buyers, and the old stories were revived of absorption by the Southern Railway or the L. & N. Selling of the smelters continued. There are the best reasons for believing that no dividend will be paid on this property this year, although the busi- cates little change compared with the same ness of the company is steadily improving. Some inside buying made its appearance on the extreme decline. The market rallied sluggishly during the afternoon and closed very dull, but with a fairly good undertone. Rates for money remained practically unchanged. Opinions in regard to to-morrow's bank statement differ materially. It is believed that the banks have lost both to the subtreasury and to the interior over \$4,800,000. Possibly the return from Philadelphia of a portion of the purchase money for the Bethlehem Steel Company may offset to some extent this loss. But the opin-

will show a decrease.
